## Tips for Success

### MTH 161

---

- **ATTENDANCE!**

Make it a goal to attend class 100% of the time. It is much easier for students to learn when the instructor is explaining concepts than it is to read a textbook or have to backtrack and find resources online that match the content. For online students this means watching the lecture videos and taking notes on the guided notes forms.

- **HOMEWORK!**

Practice, practice, practice. You have to practice to get good at it!

- **ASK QUESTIONS!**

When you don't understand something, ask questions! Ask your professor or ask tutors in the math tutoring center. You can even ask your peers! Just ask!
